When people feel lucky, it tilts the scales of ⓐ in their favour. "Their expectations become self-fulfilling prophecies," says Richard Wiseman, a professor of psychology and the author of *The Luck Factor*. Researchers at New York University discovered that students who believed that they would get a date were significantly more likely to win over the object of their desire.

The simple explanation: self-assurance. If you believe that you'll do well, you'll be more motivated. Feeling lucky might even help you win a prize at a charity dinner: the more optimistic you are about your chances, the more raffle tickets you'll probably buy. Not an optimist by nature? Lucky charms can work by boosting confidence. In a 2010 German study, superstitious subjects played a memory game; people who used talismans scored higher than those who didn't.

- 13. Which does NOT fit into the blank @?
 - ① chance
- 2 necessity
- (3) fortune
- 4 serendipity
- 14. Which is the best title for the passage?
 - ① Expect Good Things
 - 2 Trust Your Instincts
 - 3 Purchase Lucky Charms
 - 4) Build a Network of Luck

% [15~16] Read the following and answer the questions. [2.5 points each]

Imagine the day when a blood test could predict whether you are likely to have a heart attack within five years, thus allowing you and your medical practitioner to do everything possible to avoid such an event.

Well, another simple blood test developed by researchers at the National Heart and Lung Institute, Imperial College London, promises to do just that.

If clinical trials are successful, instead of using age, sex, cholesterol and blood pressure levels and medical history to evaluate your risk of heart problems, the new test looks at protective antibodies that already exist in your system. These immune-system-produced antibodies, called IgG, seem to shield the body from a heart attack, even when cholesterol and blood pressure are high.

A five-year study found that patients with the lowest levels of IgG antibodies had the highest risk of heart attack, while those who had high levels of IgG were less likely to suffer from cardio-vascular disease. The findings will enable doctors to be more efficient in identifying those who need to be more closely monitored. If the blood test reveals low levels of IgG, patients can be given a therapies before their condition escalates.

- 15. Which best fits into the blank @?
 - ① inept
- 2 established
- ③ ultimate
- 4 preventative
- 16. Which is NOT true according to the passage?
 - ① The lower the levels of IgG, the more likely that a patient will have heart problems.
 - ② Protective IgG antibodies produced by a patient's immune system will play a pivotal role in the new blood test.
 - 3 Doctors are currently using the newly developed blood test to predict whether a person will have a heart attack in the near future.
 - ④ So far such factors as age, sex, and medical history, etc. of a patient have been largely used by doctors to predict his/her risk of heart problems.

※ [17~18] Read the following and answer the questions. [2.5 points each]

It took time to select just the right shopping complex, off just the right highway interchange and just the right distance from Seoul, to house a 59,000-square-metre store. It took time to solve certain mysteries, such as how to showcase kitchens that incorporate kimchi (a fermented dish) refrigerators, a uniquely Korean appliance — and even more time to untangle nuances of the market, such as the preference of South Koreans for metal chopsticks.

In all, it took about six years for Ikea to unveil its inaugural store in South Korea, in Gwangmyeong, from the first scouting trip to the opening in December 2014.

The lag was quintessentially Ikean. "The more global, the more complex it gets," says Micael Palmquist, regional manager of retail for Asia Pacific. "We need to get these things right or we will never be taken seriously."

Even with all that careful planning, Ikea managed to get a few things wrong. It misjudged the number of parking spaces needed, and a world map for sale in the store upset some customers: the body of water east of Korea was labelled the Sea of Japan rather than the East Sea, as the South Koreans call it.

But the Koreans seem, for the most part, to have forgiven the Swedes. The Gwangmyeong store, which is the company's largest in the world by shopping area, quickly became one of Ikea's top-performing outlets.

- 17. Which does NOT belong to the factors Ikea considered seriously in launching its first outlet in Korea?
 - ① traffic
- ② location
- ③ local culture
- 4 standardization
- 18. Which is NOT true according to the passage?
 - ① Ikea made preparations for about six years in opening its first shopping complex in Korea.
 - ② Despite Ikea's huge efforts, the Gwangmyeong store in Korea is turning out to be a failed experiment.
 - ③ The integration of regional people's needs in its sales strategy is an important aspect of Ikea's globalization.
 - ④ Some Korean customers found it unacceptable that Ikea sold a world map in which the East Sea was named the Sea of Japan.
- ※ [19~22] Read the following and answer the questions. [3 points each]
- [I] This promising system will work only if governments enforce existing rules. Like other vessels, fishing boats are required to carry transponders that indicate their position, speed and direction. Captains may switch their transponders off, of course. But the very act of doing so will be noticed, and will immediately suggest they are, as it were, up to something Afishy.
- [II] Until now, trying to stop this illegal trade has been more or less futile. The oceans are vast. Navies and coastguard patrols are small. That, though, is changing through the use of "big data." It is now feasible to synthesize information from sources such as radio transponders and satellite

observations, in order to track every ocean-going vessel that is, or might be, a fishing boat. Such data can show when a vessel is behaving suspiciously in a prohibited area. They can also link particular vessels with the receiving ships to which they transfer their catches for transport to market.

[III] Overfishing is reaching catastrophic levels. According to a recent study, stocks of the biggest predatory species, such as tuna and swordfish, may have fallen by 90% since the 1950s. Another study suggests extinction is <u>Bon the cards</u> for many species. This matters for numerous reasons, not the least of which is that a lot of people rely on fish as part of their regular diet. The problem is that one fish in five sold in a shop or served in a restaurant has been caught illegally. That amounts to 26 million tons of fish a year, worth more than \$23 billion.

[IV] There is a nice irony in this development. Overfishing is the product not just of human greed, but also of technologies such as sonar that have made finding and catching fish far more efficient in recent decades. It is a matter for celebration that technology is now up to the task of catching (a) _______.

- 19. Which is closest in meaning to the underlined <u>Afishy?</u>
 - ① extinct
- 2 suspicious
- ③ feasible
- 4 catastrophic
- 20. Which is closest in meaning to the underlined Bon the cards?
 - 1 likely to happen
 - 2 on the dining menu
 - 3 inconceivable by any means
 - 4) controllable with some effort
- 21. Which best fits into the blank @?
 - ① more fish than ever before
 - 2) fish not illegally but legally
 - 3 illegal fishermen as well as fish
 - 4 particular vessels with radio transponders
- 22. Which is the proper order of the four paragraphs [I]~[N]?
 - ① [I]-[I]-[IV]-[II]
 - ② [I]-[I]-[N]
 - ③ [Ⅲ]-[Ⅱ]-[Ⅱ]
 - $([N] [\Pi] [I] [I]$

※ [23~25] Read the following and answer the questions. [2.5 points each]

U.S. worker productivity rose 3 percent in the third quarter, the best showing in three years, while labor costs fell for a second straight quarter. The increase in productivity in the July-September quarter was double the 1.5 percent Again in the second quarter and both quarters were up significantly from a Bscant 0.1 percent rise in the first three months of the year. Labor costs fell 0.2 percent after an even bigger 1.2 percent ©decline in the second quarter. The third quarter figure for productivity was unchanged from an initial estimate while labor costs were initially estimated to have risen by 0.5 percent. Economists are hopeful that the Ddownturn in productivity may be a sign that this key measure of living standards is improving after a prolonged period of weakness. Economists believe finding ways to increase productivity, the amount of output per hour of work is the biggest challenge facing the economy right now.

- 23. Which is NOT properly used in the context of the passage?
 - ① (A)
- (2) (B)
- ③ (C)
- (4) (D)
- 24. Which is NOT mentioned in the passage?
 - 1 labor cost change in the first quarter
 - 2 labor cost change in the third quarter
 - 3 productivity change in the first quarter
 - 4 productivity change in the third quarter
- 25. Which is true according to the passage?
 - ① U.S. labor cost is rising.
 - 2 U.S. worker productivity is declining.
 - ③ Productivity is a key measure of living standards.
 - 4 Labor cost estimation for the third quarter was correct.
- ※ [26~28] Read the following and answer the questions. [3 points each]

In this exhibition of the sculptor, the emphasis is on the interrelationship between two unique elements, natural stones and iron plates. (A) Whereas his stones are found in nature, iron plates are clearly manufactured and highly refined materials. (B) While the difference between the two is that stone is of

the natural and iron plates are of the artificial, these two elements share a common denominator in that they both originated from nature. (C)

Although the stones in the exhibition are at first glance similar, upon closer observation each stone reveals itself as unique. By harmonizing the a _____ and b ____ of stones, this unity engenders deep resonance in the space. Through the artist, stone lets go of its natural quality allowing it to move closer to human nature. (D) Likewise, iron plate lets go of its artificial quality in order to step closer to nature. Stone and iron plate, consequently, are placed in a process of c______.

- 26. Which best fits into the blanks @ and @?
- (b)
- ① uniqueness singularity
- 2 peculiarity artificiality
- ③ similarity commonness
- 4 universality individuality
- 27. Which best fits into the blank ©?
 - ① conflict
- ② humanity
- ③ naturalization
- 4 reconciliation
- 28. Which is the best place for the following sentence?

It is this tension between their common source and obvious material differences that the artist exploits, successfully creating a space of both conflict and intimacy.

- ① (A)
- ② (B)
- ③ (C)
- (1) (D)

※ [29~31] Read the following and answer the questions. [3 points each]

There is a never-ending supply of business gurus telling us how we can, and must, do more. Sheryl Sandberg urges women to "Lean In" if they want to get ahead. John Bernard offers breathless advice on conducting "Business at the Speed of Now." Yet the biggest problem in the business world is not too little but too much — too many distractions and interruptions, too many things done for the sake of form, and altogether too much busy-ness. But what is clear is that office workers are on a treadmill of pointless activity. Managers allow meetings

to drag on for hours. Workers generate e-mails because it requires little effort and no thought. An entire management industry exists to spin the treadmill ever faster. (A) All this "leaning in" is producing an epidemic of overwork. This activity is making it harder to focus on real work as opposed to make-work. Teresa Amabile of Harvard Business School, who has been conducting a huge study of work and creativity, reports that workers are generally more creative on low-pressure days than on high-pressure days.

(B) There is a distinguished history of leadership thinking in the lean-back tradition. This tradition has been buried in a morass of meetings and messages. We need to revive it before we schedule ourselves to death. The most obvious beneficiaries of leaning back would be creative workers, whose most important resource is their time, particularly big chunks of uninterrupted time. Indeed, creative people may be at their most productive when, to the manager's untutored eye, they appear to be doing nothing. (C) Those at the top are best employed thinking about strategy rather than operations, about whether the company is doing the right thing rather than whether it is sticking to its plan.

Doing nothing may be going too far. Managers play an important role in coordinating complicated activities and disciplining slackers. And some creative people would never finish anything if they were left to their own devices. (D) But there is certainly a case for a _______. Leaning in has been producing negative returns for some time now. It is time to try the far more radical strategy of leaning back.

29. Which is the best place for the following sentence?

It is high time that we tried a different strategy — not of "leaning in" but "leaning back."

- ① (A)
- ② (B)
- ③ (C)
- ④ (D)
- 30. Which best fits into the blank @?
 - ① doing a lot less
 - 2 sticking to the plans
 - 3 thinking about operations
 - 4 spinning the treadmill ever faster

- 31. Which is the best title for the passage?
 - ① In Praise of "Leaning Back"
 - 2 The Treadmill of Pointless Activity
 - ③ Effectiveness of "Leaning In" Strategy
 - 4 Manager's Uselessness for Creative People

[32 \sim 34] Read the following and answer the questions. [2.5 points each]

Undervaluing ⓐ ______ is a common mistake. Top managers frequently put the best technical people in charge, not the best leaders. These technically oriented managers, in turn, mistakenly assume that ideas will speak for themselves if they are any good, so they neglect external communication. Or they emphasize tasks over <u>Arelationships</u>, missing opportunities to enhance the <u>Bteam chemistry</u> necessary to turn undeveloped concepts into useful innovations.

Groups that are convened without attention to interpersonal skills find it difficult to embrace collective goals, take advantage of the different strengths various members bring, or communicate well enough to share the ©tacit knowledge that is still unformed and hard to document while an innovation is under development. It takes time to build the trust and Dinterplay among team members that will spark great ideas. MIT researchers have found that for R&D team members to be truly productive, they have to have been on board for at least two years.

- 32. Which best fits into the blank @?
 - ① the scarcity of best leaders
 - 2) the importance of communication
 - 3 the power of undeveloped concepts
 - 4 the benefit of technically oriented managers
- 33. Which is most different in meaning from the other three?
 - ① (A)
- 2 B
- 3 C
- 4 D
- 34. Which is NOT true according to the passage?
 - ① Good ideas speak for themselves.
 - 2 It takes time to develop effective teamwork.
 - 3 Technically oriented leaders may not encourage communication.
 - ④ Interpersonal skills are important for productive communication in a group.

% [35~37] Read the following and answer the questions. [2.5 points each]

My students who were volunteering in an elementary school believed that the school was working hard to help many children raise Atheir self-esteem. Yet the way the school's leadership chose to do this was with lots of classroom discussion about self-esteem and self-respect. Eleven-year-old after eleven-year-old stood up and said, "I am smart. I can do anything. I am somebody." My students understood the purpose very well, and were not opposed to this if it was part of a broader plan. Yet they could not find teachers encouraging children to tackle a hard task and persevere until Bthey genuinely mastered that task.

My students believed that true self-esteem comes from actually mastering something. Two weeks of seminar on the psychology of self-esteem led <u>Othem</u> to conclude that teaching perseverance to young people is often hard, yet that what increases children's self-esteem is precisely the <u>a</u> work that is often necessary to accomplish anything difficult. Children know when <u>Othey</u> have worked hard, and when they have learned to do something well. That is what develops real self-confidence.

- 35. Which best fits into the blank @?
 - ① sustained
- 2 stressless
- ③ preconceived
- 4 unprecedented
- 36. Which is different from the other three in its reference?
 - ① A
- ② (B)
- (3) (C)
- 4 D
- 37. What is the passage mainly about?
 - ① Who most needs self-esteem?
 - ② Why is self-esteem so important?
 - 3 How can self-esteem be developed?
 - 4 What is more important than self-esteem?

※ [38~40] Read the following and answer the questions. [2.5 points each]

In Mel Brooks's film "The Producers," two men plot to make a fortune from a flop. They raise more money than they need to stage a musical, by selling all the shares in it several times over. Then they try to make the worst show ever. They assume it will close in a night and they will be able to abscond with the cash, since no investor

will demand a cut of non-existent profits. To their horror, (a)

Musicals have <u>Aodds</u> like venture capital: only one in ten makes money, and two out of ten lose it all. The hits, however, are huge. "Cats" probably made a 3,500% return for its initial investors. Since it debuted in London 27 years ago, "The Phantom of the Opera," a musical by Andrew Lloyd Webber, has grossed \$5.6 billion worldwide, more than any film or television shows.

Musicals had their first big boom in the 1940s, when Rodgers and Hammerstein wrote "South Pacific" and "Oklahoma!". In the 1980s Mr Lloyd Webber and Cameron Mackintosh, another Brit, invented the "mega musical," with big-budget shows such as "Phantom" and "Les Misérables."

The business today is not all song and dance, however. Margins are not what they were. Labor costs, especially in unionized New York, have risen, as has the price of theater rentals, sets, and costumes. David Ian, a British producer, reckons that putting on a musical is three times costlier than it was 20 years ago.

One of the recent trends is that more musicals are opening in foreign countries and moving to Broadway and the West End <u>Bafter kinks have been worked out</u>. A revival of "Dreamgirls," with music by the Supremes, opened in South Korea and came to Broadway later.

- 38. Which best fits into the blank @?
 - ① the audience loves it
 - 2 they can escape safely
 - 3 the show flops completely
 - 4) the show no longer runs after the first night
- 39. Which is most different in meaning from the underlined @odds?
 - ① What's the odds that our team will win?
 - ② They are always at odds over the same issue.
 - ③ It is by all odds that a conflict will break out soon.
 - ④ It's long <u>odds</u> against her coming back home sooner or later.
- 40. Which is closest in meaning to the underlined ®after kinks have been worked out?
 - 1) after the show has been closed
 - 2) after profits have been certainly made
 - 3 after shortcomings have been remedied
 - 4 after the response of the audience has been reviewed
